

Lesson Closure with Examples

or

40 Ways to Leave a Lesson

CLOSURE - what the instructor does to facilitate *wrap-up* at the end of the lesson - it is a quick review, to remind students what it was that they have learned (or should have learned) and allows you to see where the students are to assist you in planning for the next lesson.

The intellectual work should be done by the students – not the instructor summarizing for the students and telling them what they learned.

Closure allows students to summarize main ideas, evaluate class processes, answer questions posed at the beginning of the lesson, and link to both the past and the future.

Closure is an opportunity for formative assessment and helps the instructor decide:

1. if additional practice is needed
2. whether you need to re-teach
3. whether you can move on to the next part of the lesson

Closure comes in the form of information **from students** about what they learned during the class; for example, a restatement of the instructional purpose. This information then provides a knowledge of the results for the teacher, i.e., did you teach what you intended to teach and have the students learned what you intended to have them learn?

Lesson Closing in a nutshell – can be one or some combination of the purposes below. It should be a **meaningful** end to the lesson.

- Reviewing the key points of the lesson.
- Giving students opportunities to draw conclusions from the lesson.
- Describing when the students can use this new information.
- Previewing future lessons.
- Demonstrating student's problem-solving process.
- Exhibiting student learning.
- Creating a smooth transition from one lesson to the next lesson.

Title	Synopsis
1. Cornell Notes	Notes can be used in a variety of ways. Completing the summary, checking with a partner for completeness, comparing to teacher's idea of what the key ideas were. http://coe.jmu.edu/learningtoolbox/cornellnotes.html
2. Journal Entry	Each day students write about 2 things they learned (use of a journal could incorporate most of these other closure examples) http://content.scholastic.com/browse/article.jsp?id=3583
3. Exit Pass	Student must answer in writing questions or reflect in some way about the learning before being allowed to leave the room. Math example – work a question from the material covered during the lesson, use as formative assessment for the following day, sort into piles: got it/ didn't get it or minor errors / conceptual errors
Examples	<p>☺ I really understood this idea...</p> <p>☹ I have a few questions about... before I can say I understand</p> <p>☹ I don't even know where to start on ...</p> <p>! I am excited about...</p> <p>: I'd like to learn more about...</p> <p>? a questions I have is...</p> <p>△ This point is really clear</p> <p>□ One thing that squares with things I already know is...</p> <p>○ An idea that is still going around in my head is...</p>
4. You're stuck here until...	This is a variation of the exit pass and great for a 90-30 second gap before dismissal. Depending on time, have students discuss the day's vocabulary and then they have to define one word in their own words, to you, before they go out the door. If they are having difficulty, have them step to the side and listen to several other students and then try again. This should be framed in good humor, not in a punitive way.
5. Whip Around	Students quickly and verbally share one thing they learned in the class today. You can have them toss a ball from one to another or just have volunteers. (Caveat – you have to have a safe trusting environment. I have seen this done where kids chose others based on their perception that the student won't have anything to say.)

6. 3-2-1	3 things they learned, 2 things they have a question about, 1 thing they want the instructor to know – post-its, index cards, whatever
7. Fishbowl	Student writes one question they have about the topic of this lesson. This can be something for which they know the answer or for which they want an answer. Form an inner and outer circle. Share question with the person in front of you see if they know the answer, switch who is asking question, if time rotate to a new partner
8. Summary Paragraph	What was learned today – be specific with examples!
9. Explain a Procedure	Write to an absent student and explain how to
10. Here's How...	Students write a detailed explanation of a procedure - with an example to demonstrate their understanding of the concept. They then give their partner the un-worked example and the detailed instructions and have the partner work the example from the directions. Then they peer edit the procedures for clarity.
11. Cliff Notes, Jr.	Students prepare a "cheat sheet" that would be useful for having during a quiz over the day's topic.
12. Three W's	Students discuss or write <ul style="list-style-type: none"> • What did we learn today ? • So What ?(relevancy, importance, usefulness) • Now What? (how does this fit into what we are learning, does it affect our thinking, can we predict where we are going)
13. Pair / Share	Tell the person next to you 2 (3,4,5,...) things you have learned today, then the groups report out. Variation is to have students Think/Write/Pair/ Share
14. Gallery Walk	Students create graphic representations of their learning and post them. Students can either share out the posters or students can move from station to station – writing questions or comments, noting similarities and differences, reflect on what they might do differently if they were to repeat the process.
15. Choose from the Daily Dozen	Student choose two questions from a generic list to respond to about the day's lesson.
16. Quiz	Could be daily or intermittent. 2-4 questions to show what they learned. Small individual whiteboards work well for a formative assessment and reduces the paperwork. Don't forget to ask conceptual questions!

17. Thumbs Up / Thumbs down	Pose some questions that can be answered thumbs up/down/sideways, ask for explanation of the decisions.
18. Quick doodles	Doodle / draw two or three concepts presented in the lesson may include words or numbers.
19. Key Ideas 	Students list the key ideas from the lesson and why they were important.
20. "What am I?" (riddles for key terms)	Have students construct clues (riddles) about the key terms and quiz partners or the room
21. Jeopardy	Teacher gives answer. Students create the question. This works well with dry erase boards. http://www.hardin.k12.ky.us/res_tech/coun/countyjeopardygames.htm
22. Be Alex Trebek	Student poses answer/question to group about lesson –responses should come from other students, not the teacher
23. Be the Teacher	Students present three key ideas they think everyone should have learned. Could be done with a group or individually –responses can be either oral or written.
24. The Five W's	Students explain the who, what, where, when, why and how of the lesson.
25. Credit Cards	Students are given an index card and required to state the lesson's objective and if they feel that objective was met. Credit given for participating.
26. Postcard	Students are given an index card and they write a postcard to their parents explaining the day's lesson.
27. Pros and Cons	Students list pros and cons of the issue discussed in class (might be a challenge in a math class.)
28. So What's Up With?	Students raise questions about something they either were unsure about or need clarification. Can be done orally or written.
29. Quiz Master	Students prepare a short quiz (\pm 5 questions with answers) At least 2 of the questions must start How...? or Why...?
30. Journal Entry	Each day students write about 2 things they learned (use of a journal could incorporate most of these other closure examples.)
31. I Care Why?	Students explain relevancy of the concept to their life or how they might use it.
32. It Fits Where?	Students create a "time line " of the concepts taught (sequence the concepts) or explain a connection to something else they know.

33. Element of Surprise	Students receive an envelope containing a card with a word or phrase selected by the teacher. Students discuss the concept and list the content-specific vocabulary necessary to discuss it.
34. Numbered Heads Together	Students in groups of up to five are numbered sequentially. As a group they create a list of 3-5 things learned in the lesson and then the teacher calls one number from each group to report to the class something they learned.
35. We Learned What?	Students write open ended questions on index cards. Two students are selected to come forward. The first student draws a question card and poses the question to the class. After the class discusses the question and answers with their partner - the second student draws a student name card to respond to the question. (These questions could also be used to launch the next day's lesson.)
36. We're Going Where?	Students predict the topic of tomorrow's lesson – be sure to refer to the predictions the next day as either an opener or in closure.
37. It Looks Like This	An actual object or model that directly relates to the lesson is shown and students explain how it connects to the day's concept.
38. Sell It To Us	Write a jingle that explains the main idea of the lesson.
39. Commercial	Students write a 1 – 2 minute commercial to use at home when asked, "What happened in math class today?"
40. 4 box synectics	Synectics connect unrelated ideas through metaphor. Students have a sheet with four boxes. In each box is a stem. Solving equations is like eating an orange because... "Solving equations is like driving a car because..."
